VISION

To be leaders in creating healthy communities and healthy environments.

OUR MANDATE

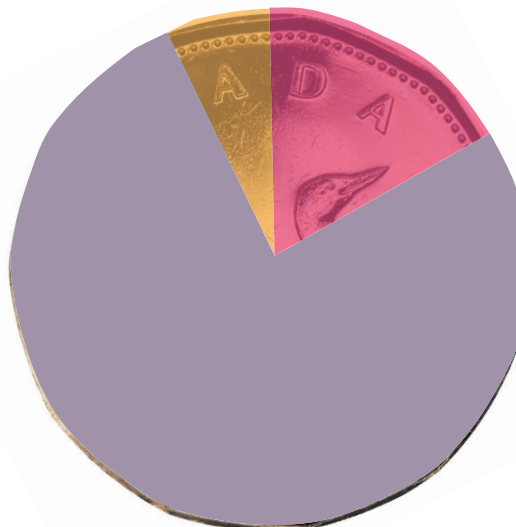

The mandate of the Thunder Bay District Health Unit is legislated under the Health Protection and Promotion Act.

The primary focus of public health is the health and well-being of the whole population through the promotion and protection of health and the prevention of illness. Minimum requirements for the delivery of public health programming are set out in the Ontario Public Health Standards.

OUR 2016 BUDGET

The consolidated budget for public health services provided by the Health Unit within the District of Thunder Bay totals approximately \$16.83M. Of this total, 77% is funded by the Province of Ontario, 17% or \$2.84M is funded through the municipal levy and 6% is derived from fees, charges and other sources.

What your levy buys\$

Health promotion, protection and disease prevention are complex and extensive and are made up of the following program areas:

FAMILY HEALTH, INCLUDING:

- Oral health education and preventative services for children as well as in school dental screenings. The Healthy Smiles Ontario program provides no-cost preventative, urgent and non-urgent dental treatment for eligible children up to age 17.
- Healthy Babies Healthy Children program for coordinating services to address the needs of families with children from birth to age 6 who may be at risk for health, behavioural and social problems. Home visiting and telephone counselling is offered to parents.
- Breastfeeding clinic & resources for supporting breastfeeding mothers at community locations, TBDHU and in the home.
- Prenatal classes and parenting programs providing parents with information and support.
- Fair Start developmental screening for children 18 months to school age to support healthy child development. Referrals are made to appropriate children's services when needed.

INFECTIOUS DISEASE, INCLUDING:

- Sexual health program providing clinical services, outreach services, harm reduction strategies and education to the community.
- Infection Prevention and Control promotion to increase awareness among relevant community partners and the public. Case management and follow up of all reportable diseases.
- Immunization of children and adults to provide protection from a range of vaccine preventable diseases.
- Vector borne disease surveillance programs for assessing the risk of infection of West Nile virus and Lyme disease and investigating all potential human exposures to rabies from animal contacts.

CHRONIC DISEASE & INJURY, INCLUDING:

- Chronic disease prevention program for working with schools, worksites and community partners to provide health promotion activities, build supportive environments and influence policies to encourage healthy eating, physical activity, healthy body image and UV protection.
- Prevention of injury and substance misuse program for working with community partners to influence healthy policies and create supportive environments for health. The program provides activities to address the misuse of alcohol and other substances, road and off-road vehicle safety, prevention of falls across the life span, and youth suicide prevention.
- Comprehensive tobacco control including training, policy development, prevention, education, youth engagement, cessation resources and programs, and enforcement of the Smoke Free Ontario Act.

ENVIRONMENTAL HEALTH, INCLUDING:

- Food safety services for educating food handlers and inspecting establishments.
- Water safety services for monitoring public and private sources, ensuring water is safe for drinking and recreation, according to the Ontario and Canadian Water Quality Standards.
- Health hazard prevention and management for maintaining a 24 hour, on-call emergency response to prevent and control outbreaks of communicable diseases.

LAND DEVELOPMENT program for reviewing all properties that are developed or planned to be serviced with in-ground sewage disposal.

EMERGENCY PREPAREDNESS for enabling and ensuring a consistent and effective response to public health emergencies and emergencies with public health impacts.

CORPORATE EXPENDITURES including costs for the governance of the Health Unit, facility maintenance, computer equipment and communication for all Health Unit sites.
