

Your Kids Can Be Flu Fighters!

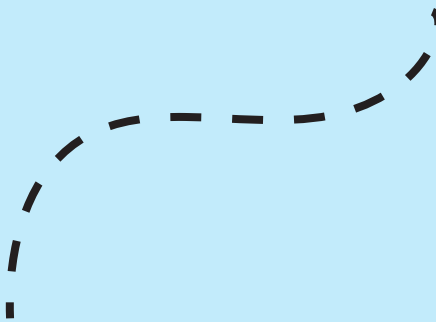

Children aged 6 months to 4 years old are at an increased risk of serious complications from the flu. To get a flu shot for a child under 5 years of age, you can :

1. Ask your **health care provider**

2. Call your **local pharmacy** to see what ages they will vaccinate

3. If you do not have a health care provider, visit **ThunderBayFlu.ca** or call **1-888-294-6630** for info on other vaccination options
